

The gasoline-driven floor saw by Wacker Neuson is particularly characterized by its superior cutting performance. All model versions are up to 20 percent faster than comparable devices so that the BFS offers the highest cutting speed with a quiet operation. This is because the torque that is transmitted to the diamond blade and the center of gravity that is above the cutting shaft are efficiently adapted to each other. And this with a low weight, because the BFS is the lightest in its class.

- **Low hand-arm-vibrations below 5 m/s²**
- **Superior cutting performance: Up to 20 % faster than comparable devices**
- **Requires very little maintenance due to lifetime-lubricated bearings**
- **High directional stability through the high tensile strength frame and ball-bearing wheels**
- **Variably adjustable cutting depth**

Central lifting point

The machine always remains balanced when lifted by the central lifting point.

This ensures that the rear wheels always touch the ground first and not the cutting blade.

Water Tank

The BFS-series has the largest water tank in its class.

BFS 1345 - 32 liter

Optional transportation handle

Makes the transport of the machine easy and user friendly.

Wide wheelbase

More stability in operation.
